## A MESSAGE FROM VENTURE HIGHWAY

Venture Highway was started as a passion to seed next-generation tech entrepreneurs building from India.

In our journey, we have had the privilege to partner with the founders of Meesho, Moglix, Sharechat, MPL, and many more, all of whom share a few common traits. These common traits include desire, resilience and a high capability to create world-class companies from India!

Some say that the desire “to build an institution” is almost a special DNA in individuals and that this desire starts early in their lives. The proof is that quite a few of our founders began their start-up journey in their dorm rooms. Many others had the seed of their future startup on the college campus.

Assimilating stories from our founders and based on our own experience, we understand that the campus and the dorm room are prized places where ideas brim, networks flourish, and co-founders are found!

We decided to go to the dorm rooms to find our next potential partners, the genesis of our Student Venture Partner Program (“SVP” program).

The program's key goal was to “give back” to the start-up ecosystem by exposing highly talented individuals such as yourselves to the world of ideas, tech, product, operators and venture capitalists. In the process, we also wanted to learn from you about future business opportunities and get exposed to your networks, which are the breeding grounds for such ideas.

We have completed our third season of the SVP program, and it has been nothing short of a fantastic experience for team Venture Highway to learn from and work with you, as we hope it was for you as well.

This yearbook is an effort to memorialise our time together.

Warm Regards,  
Neeraj & Priya

# SVP PROGRAM

## THE REAL MVP

We wanted this to be a real learning experience for you, a backstage ticket to live interactions with investment managers and startup founders. The program included many live interactions, curated sessions and specific, actionable projects with our portfolio. However, the main highlight was the excellent set of startups sourced and presented by you to us.

## MESSAGE FROM THE FOUNDERS

---

# ALOK GOEL

FOUNDER, DRIVETRAIN

I had a great experience doing the AMA session with the SVPs. I was amazed to see how deeply they were aware of the VC industry and its mechanics. The questions were very thoughtful and went pretty deep into strategy and meta-learnings from life :) They are clearly a bright and talented group of individuals, and I am excited to see what they accomplish in the future. Wish them great luck!

# ABHISHEK GOYAL

FOUNDER, TRACXN

I was really impressed with the questions of the SVPs. They were thoroughly updated about my work and our journey at Tracxn. They demonstrated a deep passion for entrepreneurship and were eager to learn and asked great questions about how to build successful startups. I'm confident that they will all go on to do great things. They have the potential to be the next generation of VCs and founders.

## APPLICATION PROCESS & SELECTION

The key takeaway for us this cohort, during the admissions, was the thoroughness demonstrated by the applicants in their research and submissions. This is evidence of your strong intent, awareness and curiosity.

The selection rate was 1%, compared to 3% in 2022 & 2021, and the key criteria we applied were: clarity of thought, demonstrated execution and passion for startups.

Team Venture Highway had the opportunity to interact with the entire cohort across many occasions. Our common observation was the high quality of questions, perspectives and the speed of work. Out of the 1000 companies sourced by your cohort, 5 companies had previously reached a partner-level discussion and were funded by the ecosystem. This percentage is very encouraging and is demonstrative of the quality of startups brought forth by you.

2023 has been an interesting and trying year for the startup world with significant degrowth in funding, more focus on governance and continued pressure for startups to grow, albeit with a fiscally frugal mindset. Given the context of the environment, the startup ecosystem, founders and investors alike, is going through a stage of re-evaluation and, perhaps, a re-imagination of the current structures!

In this melee, we need more genuinely earnest, curious, passionate and intellectually honest participants to become founders, operators and investors. We see in many of you the potential to take up that mantle.

Thanks for trusting us to play a small part in what we believe will be a magical journey.

Straight out of undergrad, Venture Capital was a jargon which I had little to no knowledge about. Gaining insights into an industry with small teams and big ideas is usually inaccessible but the intricately curated Student Venture Partner Program by [Venture Highway LLP](#) has been the perfect launchpad for me to understand an investors' perspective!

This program takes you over the entire workflow of a VC's journey, starting with sourcing, diligence, deal evaluation, thesis building, and portfolio management. Joining founder calls, representing the firm and then discussing the thesis internally equipped me with fresh insights, multi-directional views and holistic perspectives!

Reflecting on my incredible experience as a Student Venture Partner at [Venture Highway LLP](#), I am filled with gratitude and a sense of accomplishment. This program has been a pivotal launchpad for me to gain profound insights into the world of venture capital and understand the investor's perspective.

Through this program, I have had the privilege of delving into every aspect of a VC's journey, from sourcing and diligence to deal evaluation and portfolio management. The knowledge sessions led by esteemed thought leaders and pioneers in the industry, such as [Priya Mohan](#), [Rahul Garg, CFA](#), and [Aviral Bhatnagar](#) have been a source of immense enrichment.

Looking back at my summer post-MBA, one of the brightest moments has been my stint as a Student Venture Partner at [Venture Highway LLP](#).

It has been an absolute pleasure to be a part of this prestigious program. A curated peek into the world of VC, I have been exposed to all facets - from sourcing, to evaluation, to portfolio management, as a part of the VH team.

It's been a privilege and honour to hear from top minds in the ecosystem - [Priya Mohan](#), [Rahul Garg, CFA](#), [Abhishek Goyal](#), [Alok Goel](#) and to have weekly discussions with brilliant and nuanced insights from [Aviral Bhatnagar](#).

[Akul Jindal](#) has been a phenomenal guide and mentor, with his knowledge, experience, and great sense of humor. [Parth Chhapparwal](#) and [Abishek Chopra](#) have been so helpful and approachable, and the whole team has made this experience all the more memorable.

For the past five weeks, I have been a Student Venture Partner at [Venture Highway LLP](#), immersing myself in the world of venture capital. After gaining some exposure to the Venture Capital landscape during my previous internship at Speciale Invest, I strongly desired to delve deeper and expand my knowledge. That's when I discovered the SVP program offered by [Venture Highway LLP](#).

This program has been meticulously designed to understand the VC journey comprehensively. From learning the intricacies of sourcing promising startups to evaluating founders and managing portfolios, I have gained immense knowledge and expertise. Engaging in hands-on experiences such as leading founder calls and conducting industry analyses has added tremendous value to my learning. Additionally, the opportunity to work with [Meragi](#) for their market expansion has been fascinating.

# FROM THE VH TEAM

## COHORT-WISE LEARNINGS AND OBSERVATIONS - 2022

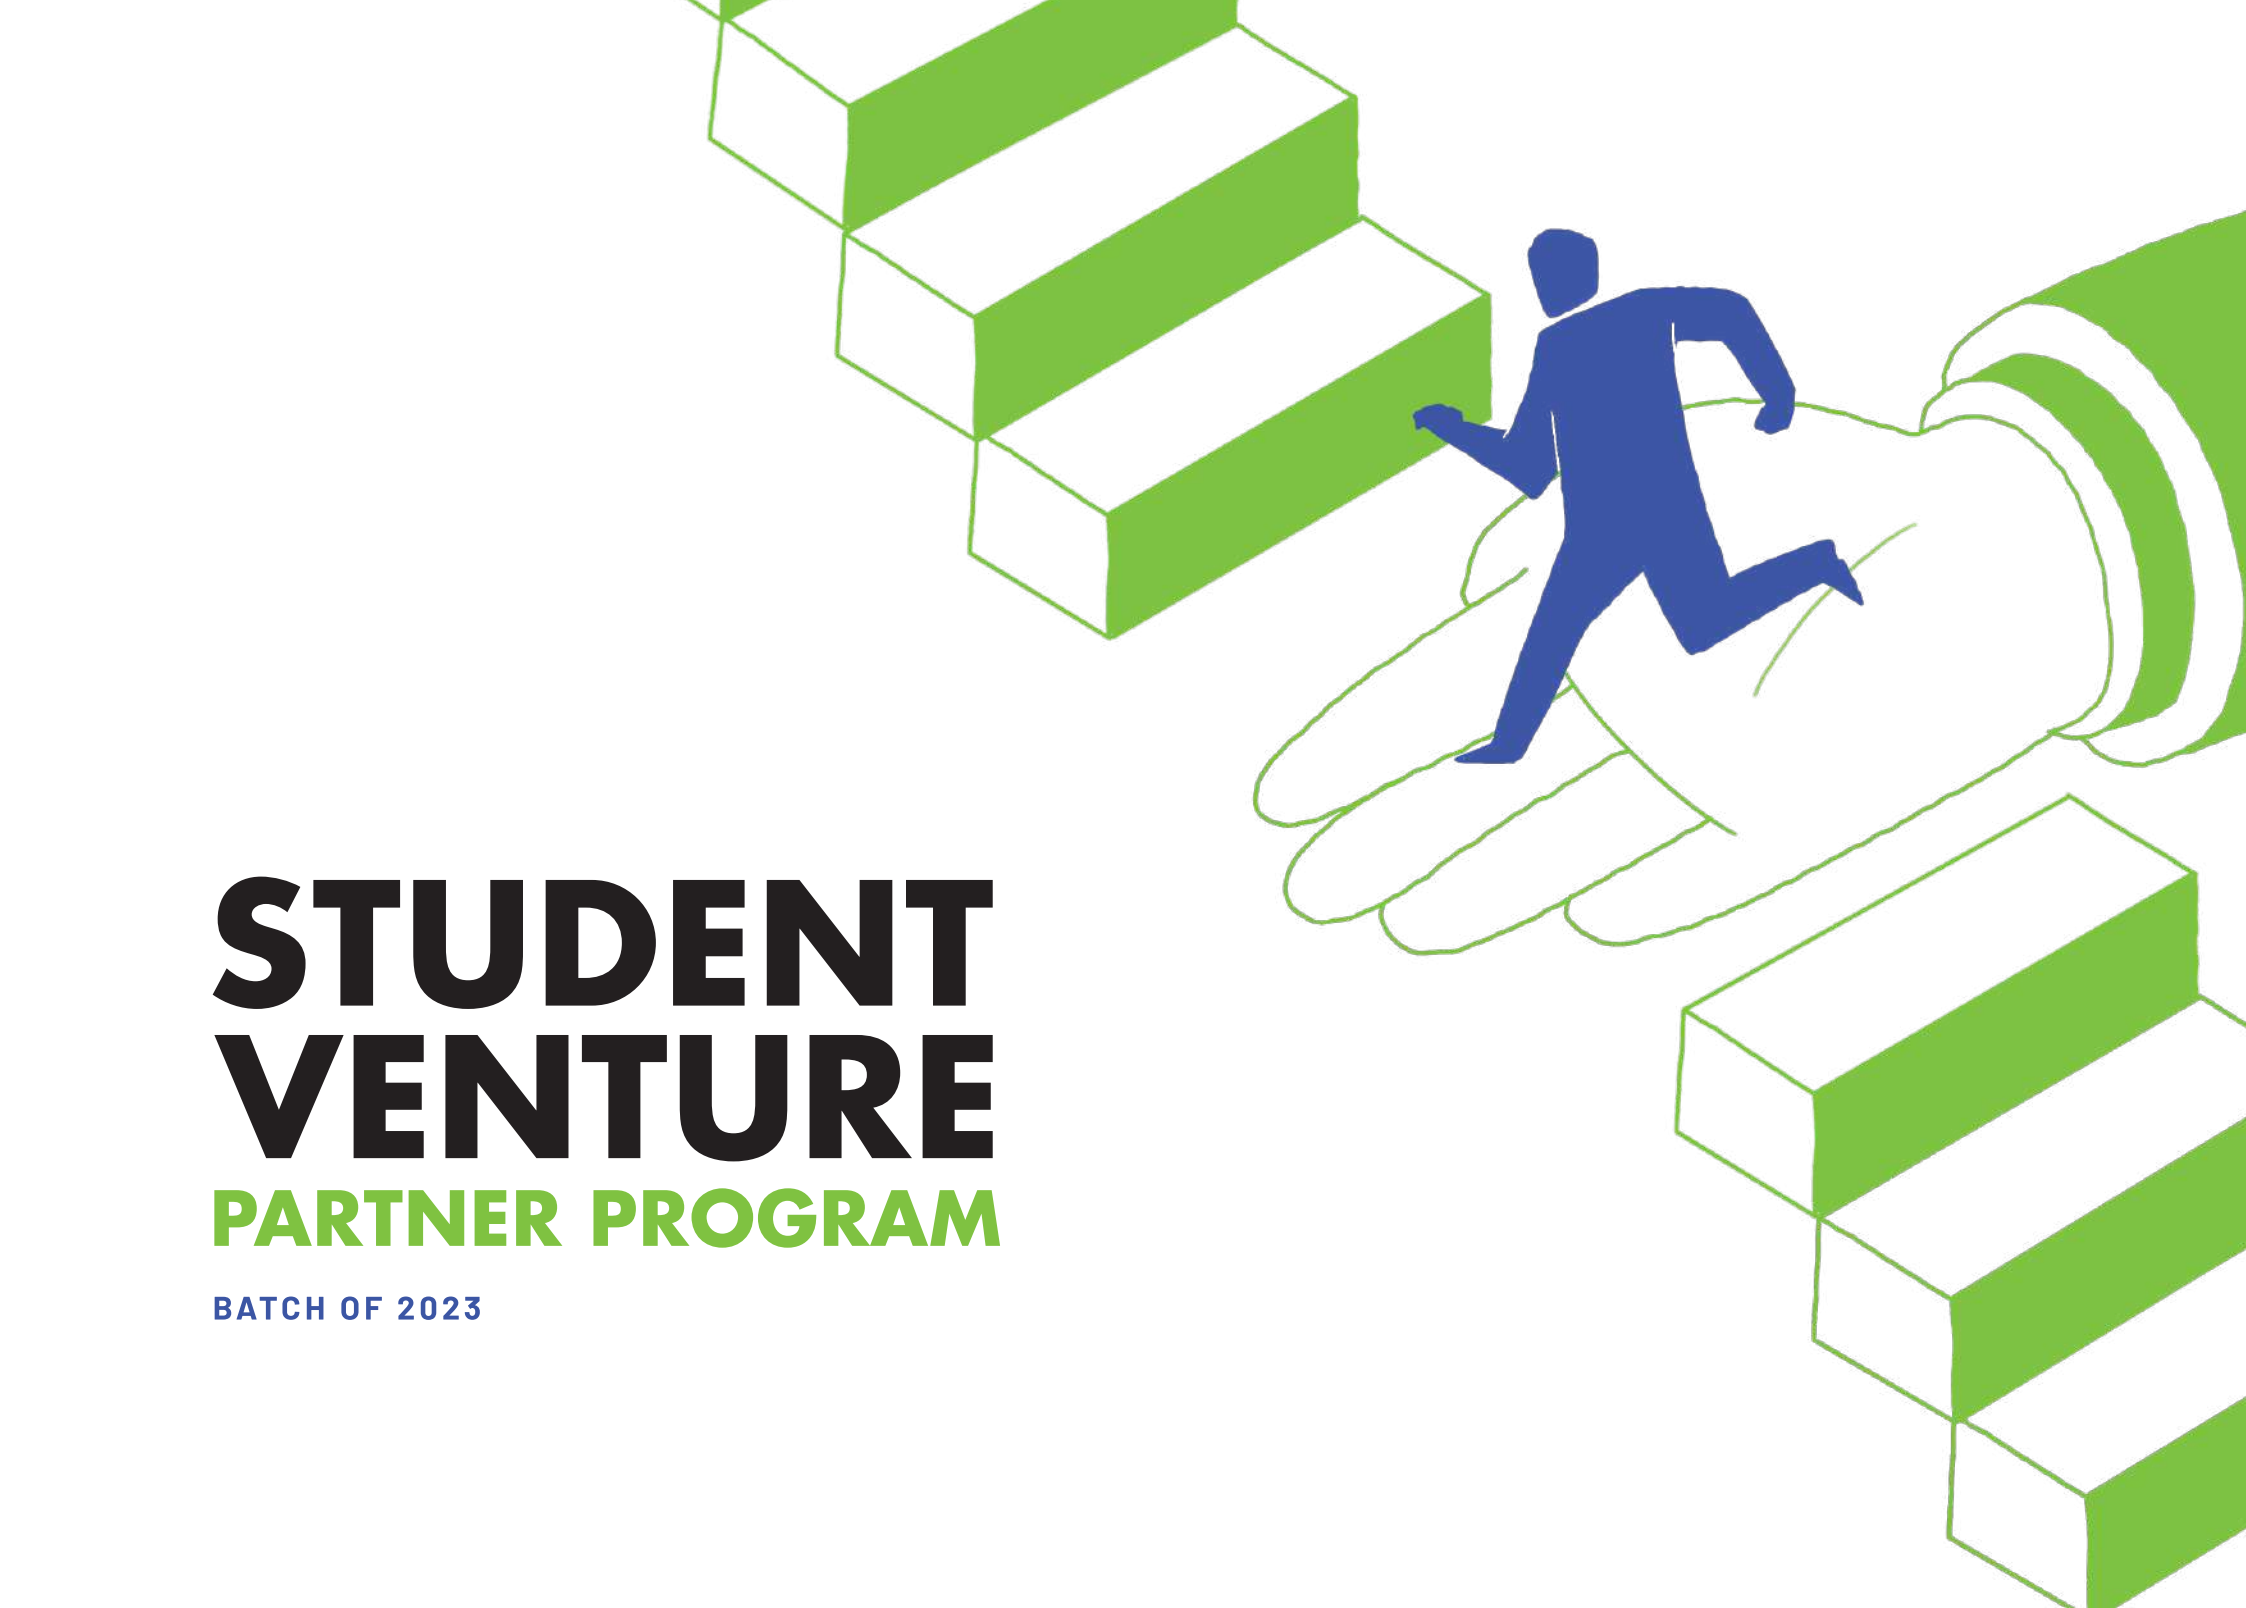

With the lessons we learned from the first cohort, we were able to expand the program by 60% and enable more students across more colleges. We saw a lot of warmth in the smaller groups, and that feeling continued as we expanded.

As the second cohort, you already had a baseline of expectations of what to expect from talented students like yourselves. The quality of your questions and perspectives across all interactions with the VH leadership team indicated that many of you had done your homework and had high clarity of thought about the startup world.

In 2022, deal flow was different than it had been in 2021. Yet, you found 400+ companies out of which 3 were our portfolio companies in stealth mode. This was a clear validation of your high-quality sourcing. Your suggestions on how to improve and scale the program were extremely useful, and we plan to implement some of them in the next cohort. A key one being extending the program beyond the fixed time window.

We can visualise each of you playing a critical role in the ecosystem as founders, business leaders and investors.

We thank you for your trust in us.

The team at Venture Highway curated an excellent learning experience that not only introduced me to the fundamentals of the space but gave me sharpened perspectives about the startup ecosystem as a whole. I am immensely grateful for the nuanced discussions with my talented peers and mentors during the program. Most Inspiring, though, was the opportunity to interact with passionate founders who changed how I looked at things. If you're in a transitional phase, I'd highly recommend applying to future cohorts of the SVP program. Trust me; you won't regret it!

It has been an extremely exciting journey with the VH team! Calling this an internship would be a gross understatement. I have thoroughly enjoyed working (more so learning) here with everyone. The program walks you through the entire VC journey step-by-step and has given me a taste of what it takes to be an early-stage investor. A shout out to Akul and Aviral for making sure each SVP grows at their own comfortable space and the individual mentoring has been unparalleled. I would highly recommend this experience to anyone who is keen on learning and contributing to the VC space!

Really enjoyed the unique opportunity to be associated with VH. To me the culture that permeated within the firm, right from partners to our mentors was what stood out. Everyone was so down to earth, ready to listen and always willing to help. On the learning front, great insights on the day-to-day functioning of a junior VC right from sourcing, founder calls and portfolio work. Truly satisfied with the value for the energy and time put in. Looking forward to keeping in touch with you all!

Where to start? 100 words is too less to document 8 weeks. But yeah, I learnt the craft from one sliders of Aviral. Looking back, one of the best times I have had working while having fun. It was such an enriching experience in terms of founder calls as it threw light on the diversity of problems in the ecosystem & it was kinda fun to be on the other side evaluating them. Working with portfolio companies gave an insider view of a founder journey. Loads of takeaways from each & everyone in the team. Hoping to stay in touch with all of them:)

The SVP program has been the best launchpad that I could have found into the world of venture capital. The learning curve has been very steep and I've learnt a lot right from sourcing and diligence to working with portfolio companies and presenting to the IC. However, the best part - all this learning was accompanied by so much fun! The interactions with the team as well as my fellow SVPs have been amazing. One of the most memorable internships so far!
